

Special tools.

Tools for honeycomb materials.

THE SOLID ONE.

Die-cutting of thick materials is a big challenge. Whether honeycomb board or honeycomb plastic. Or other thick materials. Here a very special tool is required. It must be stable. Resistant. And strong. Specially equipped to be able to pass through the thick material optimally. And to deliver good die-cutting results. Marbach tools for honeycomb materials are specially equipped. With particularly robust serrated rules. Matching magnetic counter plate. And a perfect ejection technology. For a wide range of applications. Like the inside of doors. Edge protection. Pallets. Plug connections. Packaging trays. And much more. Special tools for honeycomb materials. Perfectly suited to your requirements.

stable construction

high durability

robust cutting rules
