

Special tools.

Converting tool.

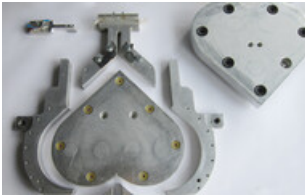

THE SPECIAL ONE.

No cutting die. But perfectly fitting tool inserts for your converting machine. The tool inserts are manufactured with precise contours and are individually adapted to your machine. For simple and fast converting of bulk goods in the food industry. For test purposes of particularly difficult contours, we also manufacture wooden test tools for you. So that you can test extensively before you invest in an aluminum tool.

individual production

best functionality

optimally suited for bulk material
