

Special tools.

Adapter frame.

THE FLEXIBLE ONE.

You want maximum flexibility in your production? With the adapter frame you do not need a complete dieboard for every order. Because you can leave the adapter frame in the machine. And you only need to change the individual inlay for each order. Quick and easy. You save time. Storage space. And save resources at the same time, since you do not need a complete dieboard for every order.

The adapter frame is matched to your machines. In size. And in format. For maximum flexibility with frequent tool changes.

maximum flexibility

individual inlays
