

Special tools.

Filter cutting-die.

THE INDIVIDUAL ONE.

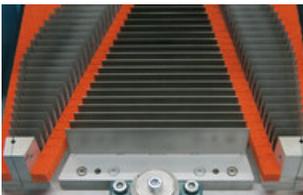

Die-cutting filters. A very special challenge. And a very special tool. Filter cutting-dies from Marbach. For interior filters. Activated carbon filters. Air filters. And other filters for the automotive industry.

The Marbach filter tool is equipped with specially adapted lamellas in the upper and lower part. Contour-adjusted. The filter is placed on the steel lamellas of the lower part of the tool. The upper and lower parts are pressed together. Perfectly fitting. The lamellas of the filter are formed. The outer contours are die-cut with the cutting rules positioned in the tool. For a perfect and clean cut. And an extremely smooth die-cutting process.
