nick grinder with rechargeable battery

THE FLEXIBLE ONE.

The nick grinder with rechargeable battery is a manual hand tool for grinding nicks into cutting rules. The powerful battery ensures high flexibility for use in your production. Thus, no power socket is necessary in the immediate environment of the application. And no cable interferes with the use of the nick grinding device. This also increases safety during operation.

The large contact surface of the battery-powered nick grinder ensures very stable and precise grinding. Due to the integrated scale, the nicks can be placed exactly at the right place into the cutting rule. The perfect grinding speed ensures absolutely burr-free nicks.

The nick grinder impresses by its easy handling. Your nicks are best achieved with the Marbach grinding discs. Available in different versions and thicknesses: Diamond for a long service life. Or the more affordable mafix version, for variety in all sizes. Our grinding discs are available with different hole diameters.

Nick grinder with rechargeable battery. For precise nicks.

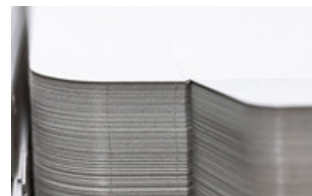

Flexibility: powerful rechargeable battery for flexible use without cables.

Precise and burr-free nicks.

Simple and safe handling.

Technical details of the product

- Suitable for mafix cutting discs $\varnothing 50 \times 6$ or $\varnothing 50 \times 8$ as well as $\varnothing 50 \times 10$
- Long-lasting high-performance rechargeable battery.
- Li-Ion technology with integrated single cell monitoring.
- 18V battery with maximum performance (8 lithium-ion cells).
- Charge level indicator on each battery.
- Quick change battery.
