

mobile repair workstation

mbench|smart

THE CLEVER ONE.

Maximum flexibility and efficiency: with the mobile repair workstation mbench|smart you will be prepared for all situations and for reworking the cutting-die, e.g. directly at the die-cutting machine. Its smooth-running heavy-duty wheels ensure safe and quick transport to its place of use. Optionally equipped with the most important rule processing devices such as the hand bender mbend or the multifunctional device mcut|multi for cutting to length, notching and lipping, it will become an indispensable companion in your production. The 5 integrated drawers offer plenty of space for your accessories. The rear panel includes 6 shelves for different cutting rules, easily accessible via a central access opening.

Also available as an option: the matching LED work light. It has an adjustable arm and can be magnetically attached to any part of the mbench|smart. For the best visibility when working on your tools.

mbench|smart. Your mobile companion for fast and cost-saving on-site repair of your tools.

Flexible: equipped with the most important rule processing devices.

Spacious: 5 drawers for accessories.

Mobile: smooth-running heavy-duty wheels.
