

professional assembly table

mbench|pro

THE UNIVERSAL ONE.

The mbench|pro is a professional assembly table for your production. It can be used in die-making, for rework directly at the die-cutting machine, or in die preparation. It is larger than the mbench|smart. And even more versatile. A complete workstation with a flat mounting surface. In its 9 drawers you will have plenty of space for accessories and important equipment for processing your cutting-dies. Of course, the mbench|pro can also be optionally equipped with the most important rule processing devices. And just like the mbench|smart, it has smooth-running heavy-duty wheels for maximum mobility.

Also available as an option: the matching LED work light. It has an adjustable arm and can be magnetically attached to any part of the mbench|pro. For the best visibility when working on your tools.

mbench|pro. Your mobile assembly table for maximum performance in your production.

Versatile: a complete workplace with assembly area.

Spacious: 9 drawers for accessories.

Mobile: smooth-running heavy-duty wheels.
