

Digitalization

Connect|M

Die-cutting 4.0.

CONNECT|M is a groundbreaking software. This provides for cloud-based, digital connection of cutting-die, die-cutting machine and operator. The result are performance data in just one click.

Connect|M is a special, newly developed software combined with various hardware components. Cameras, sensors and QR codes provide a link between the tool, die-cutting machine and operator in the production of a packaging manufacturer. This digital connection enables performance tracking and efficient tool management. The result: trends are identified at an early stage on the basis of the key performance data obtained and potential is identified: the perfect basis for decisions relating to the die-cutting process. For maximum transparency in packaging production.
