

Logistics & equipment

## mdss

**PERFECTLY STORED.** Storage systems MDSS|smart and MDSS|pro.

Efficient in-house logistics begin with the perfect storage of cutting-dies. With the Marbach Die Storage Systems (MDSS), your tool packages are not only safely protected, but also always ready to hand – just in time for use on the die-cutting machine. Whether flat or rotary, the modular MDSS|smart and MDSS|pro storage systems flexibly adapt to your requirements and thus ensure smooth production.

### Individual solutions for maximum efficiency

MDSS|smart is the smart solution for smaller projects and impresses with its manual operation and clear storage. MDSS|pro, on the other hand, is a high-end system with a semi-automated crane that offers maximum efficiency for larger companies.

Developed in collaboration with the sheet metal specialist Karoń-Lettero, MDSS combines Marbach's decades of experience in die-cutting technology with Karoń-Lettero's specialized know-how – for the highest performance, even before the die-cutting process begins.
