

Rubbering

marbaject

HIGH PERFORMANCE EJECTOR RUBBER.

One rubber. Specially designed for use in die-cutting technology (corrugated board flat and rotary). Different rubber types, always perfectly matched to each other. marbaject stands for optimum ejector function due to its high rebound elasticity. Its unique material composition ensures high abrasion resistance and thus a very long service life. In addition, marbaject protects the nick and has a good adhesive function, yet can, if necessary, also be removed again without leaving any residue. And best of all: marbaject is [ISEGA-certified](#) and can therefore also be used in the food sector. Cutting-dies with marbaject – for maximum performance in packaging production.

Optimum ejector function

Long service life
