

Die-cutting technology.

marbacovert|2.0.

A corrugated board cutting-die. Fully covered with rubber. This ensures that the corrugated board is compressed over its entire surface during the die-cutting process. This reduces stresses and thus cracks in the corrugated board. And with only a slight loss of caliber. This is marbacovert|2.0. for optimum die-cutting results, high packaging quality and smooth packaging processes.

Reduced bursting of the inner layers.

Visually appealing packaging.

Smooth packaging processes.
