

Thermoform technology SR

Thermoforming Flexi-Tab-System

The Flexi-Tab-System. Invented by Marbach. It creates a new range of application for SR technology. Because it replaces the conventional nicks in the steel-rule line. Variable nick tabs eliminate the major disadvantage of the conventional steel-rule line. This allows a new product quality. Attractive and sales-boosting packaging. Without annoying nicks.

or best end-product quality

highly flexible

always reproducible
