

Thermoforming

XXL tooling formats

Extra large tools with trim-in-place technology. For more output. And best quality. Our largest tools measure 2,000 x 1,200 mm. With up to 140 cavities. That's a record in trim-in-place technology. Double to fourfold numbers of cavities require fully developed technologies. And highest precision. For the best performance. In every price range.

highest number of cavities

stable design

maximum productivity
