

Thermoforming

Trim tools

Sometimes you will need to simplify things. Separated forming and trimming allows that. In match-metal or steel-rule technology. Optionally with additional punching unit. With our tools you can also manage the trim off-set. If needed, we equip the tools with free-flow steel-rules. Or adjustable punch in match-metal trim tools. We produce small and fast trim tools. Also for the exceptionally large ones. With highest precision. For long tool life span. And a clean cut. Always tailored to your needs.
