

Quick-lock system for creasing plates – efficient, simple, flexible.

## marbalock

marbalock is an innovative quick-lock system for fastening crease plates in packaging production. It significantly reduces make-ready times, as crease plates can be fixed with just a quarter turn – no time-consuming screwing required.

Its easy handling simplifies the make-ready process and helps maintain consistently high production quality, even with frequent format changes or varying material properties.

marbalock is compatible with different types of crease plates and enables fast, precise, and secure installation. This leads to greater efficiency and flexibility throughout the production workflow.
