

for corrugated board

marbaspeed

marbaspeed. The flat cutting-die to cut corrugated board packaging with high performance marbaject rubber promises the best operating features: high machine speeds as well as a long tool life span.

The technical features of marbaject rubber not only have advantages for [rotary corrugated board tools](#) but also for flat cutting-dies. With its high rebound elasticity, marbaject rubbering allows very high machine speeds. Moreover, through its long tool life span, cutting-dies with marbaject rubbering are perfectly suitable for high quantities. Our marbaspeed cutting-die is therefore characterized by a smooth manufacturing process in your production. And maximum performance.
