

marbaspeed flexpower

marbaspeed. The flat cutting-die to cut corrugated board packaging with high performance flexpower rubber promises the best operating features: high machine speeds as well as a long tool life span.

The technical features of flexpower rubber not only have advantages for [rotary corrugated board tools](#) but also for flat cutting-dies. With its high rebound elasticity, flexpower rubbering allows very high machine speeds. Moreover, through its long tool life span, cutting-dies with flexpower rubbering are perfectly suitable for high quantities. Our marbaspeed cutting-die is therefore characterized by a smooth manufacturing process in your production. And maximum performance.

- high machine speeds
- long tool life span
- smooth production process
