

**The Corrugated
Performance System (CPS).**
Your solution for smooth
production.

 **MARBACH**

NEW:
Das Corrugated
Performance
System (CPS).

THE CORRUGATED PERFORMANCE SYSTEM (CPS).

PERFECTLY MATCHED. PERFECTLY DIE-CUT.

Flatbed corrugated die-cutting tools often face special challenges in practice – in terms of quality, efficiency, and set-up time. Marbach developed the CPS – Corrugated Performance System – precisely for this purpose: a well-thought-out tool concept that is designed for maximum performance right from the start – ready to run. Thanks to perfectly coordinated components – from cutting rules to bearers to ejector elements – the die-cutting process becomes more stable. Specially developed technologies enable 100% waste-free production and a consistently high cutting quality that is significantly above the usual market standard.

THE CORRUGATED PERFORMANCE SYSTEM (CPS).

Exclusive to Marbach!
Productive. Waste-free. And stable.

The CPS (Corrugated Performance System) is a standardized tooling concept for flatbed die-cutting processes in corrugated board production, designed to optimize quality, efficiency, and set-up times. The precise coordination of all components ensures a stable die-cutting process with high repeatability.

YOUR ADVANTAGES:

- / **Maximum productivity** – thanks to a wide range of systems that are coordinated with each other.
- / **Long service life** – thanks to special materials, most of which are developed in-house.
- / **Guaranteed waste-free** – thanks to well thought-out stop concepts, offsets, and pad geometries.
- / **Lower cutting pressure** – around 10% less pressure through the intelligent use of materials.
- / **Shorter set-up times** – thanks to clever solutions and development in collaboration with our customers.

LEARN MORE.

The CPS is available exclusively from us! Find out more on our Experience Hub. Scan the QR code. Try it now – and experience the many advantages for yourself! With the CPS, you are opting for stable processes, minimal set-up times and consistently high punching quality – regardless of your production requirements.
