PERFORMANCE FOR CUTTING-DIE PREPARATION.

THE RIGHT EQUIPMENT FOR QUICK PREPARATION AND
SMOOTH PRODUCTION.

Maximum productivity in packaging production depends not only on the die-cutting machine and tools – the preparation of the cutting-die also plays a decisive role. Minor adjustments or repairs during production should not cost valuable time. With Marbach's hand-held devices, you can optimally equip your cutting-die preparation. For fast processing, precise results, and efficient packaging production.

mcut|multi. The all-rounder.

Hand-held device for cutting to length, notching, and nose cutting in rule materials.

YOUR ADVANTAGES:

- / Cutting, Lipping, Notching in one tool
- / Very small footprint
- / Digital caliper

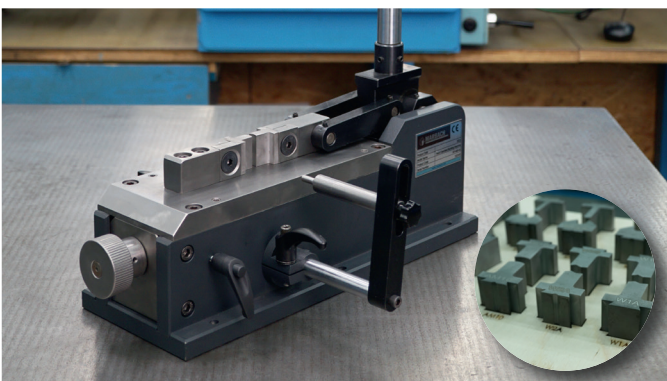

mcut|round. THE DEFINED ONE.

Hand-held device for cutting defined radii at the ends of creasing rules for consistently clean creasing results.

YOUR ADVANTAGES:

- / Flexibility: 2 radii in one tool
- / Versatility: For flat and rotary creasing rules
- / Longevity: Very robust cutting elements

mbend. THE MANIFOLD.

Manual bending device for precise and fast bending of rule material for cutting dies.

YOUR ADVANTAGES:

- / Flexibility: more than 100 standard bending inserts
- / Footprint: low space requirement
- / Special construction: little force is required for bending

mrule|extractor. THE SAFE ONE.

Rule puller device for safely removing damaged knives from the cutting-die.

YOUR ADVANTAGES:

- / Suitable for pulling 2pt - 8pt steel rules
- / Pull rules next to hard rubber
- / Adjustable feed up to the knife directly

PACKAGING. PERFORMANCE. YOU.
