

Lower pin unit.
Stripping for the really
tough cases.

Testimonial

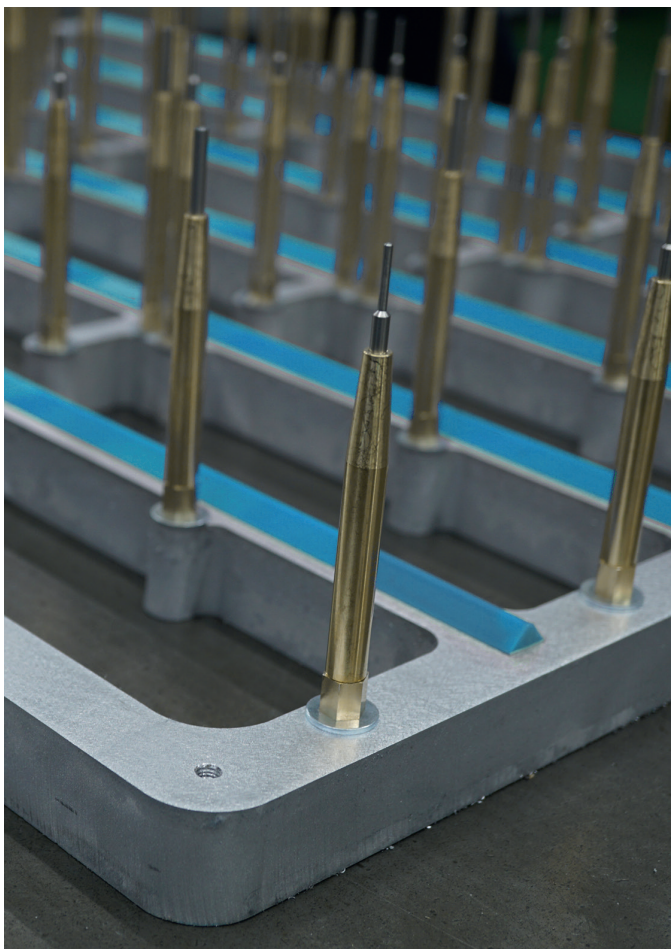

LOWER PIN UNIT.

WASTE-FREE - EVEN FOR CHALLENGING JOBS.

The stripping process has to be perfect. A major challenge: 100 % waste-free for challenging jobs. Unusual tasks therefore require unusual solutions.

That is why Marbach offers the lower pin unit. With this job-specific, specially equipped tool made of aluminum, the blanks are waste-free and the stripping process is stable. From the first to the last sheet.

Lower pin unit.

The special one.

Marbach has developed a new lower pin unit including special high precision lower pins with which waste is safely stripped during the production of packaging.

Lower pin unit are especially useful when highest reliability is required during stripping but this cannot be achieved with conventional tools. In practice, blanks are often produced and packed directly after die-cutting and then delivered to the customer. Final checks before packaging are usually not provided. It is therefore even more important that the blanks meet quality requirements and above all are 100% waste-free.

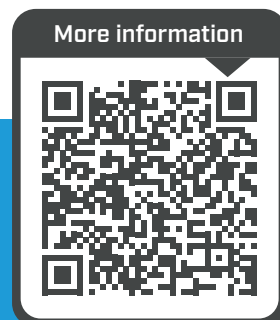

In the case of a repeat job, one does not have to set all the lower pins again, but can simply use the existing lower pin unit and start the production of the job immediately.

YOUR ADVANTAGES:

- / special high precision lower pins
- / waste-free
- / short make-ready times, especially for repeat jobs

LEARN MORE.

Discover all the details and advantages of the lower pin unit in our exclusive whitepaper on the Marbach Experience Hub. Simply scan the QR code and find out how you can make your stripping process even more efficient.
