

## Waiting for Autumn. Marbach at the FachPack in Nuremberg.

Heilbronn, 04<sup>th</sup> July 2019

The Heilbronn-based manufacturer of cutting-dies, machines as well as materials for die-making Marbach is exhibiting - as in previous years - at the FachPack in Nuremberg at the end of September. For Marbach, this coming together of the packaging industry has become an established part of the exhibition year.

Tina Dost, Marketing Manager at Marbach: "We are already looking forward to exhibiting again at FachPack in Nuremberg. The three days of the fair are perfectly suitable for presenting our new technologies and for networking with our customers and other industry members and exchanging information on the latest trends in the packaging market. Also numerous new customers find their way to our FachPack stand on these occasions."

Also, on this occasion Marbach will introduce exceptional technologies. These include the height-adjustable anvil, the platen cleaning device m|platen|cleaner, the new marbanick|2+ for inserting nicks and the PES|IV for setting up embossing dies. Marbach will also be presenting in Nuremberg tried and proven technologies such as the masterstrip|plate, pure edge, the digital zone levelling DZL|plate or the marbablanker. In addition, a topic which has quietly developed into one of the most important products for the trade fair are rotary tools with active ejection technology. These have become extremely popular in the corrugated board sector. Marbach also offers the right solution here.

Dost continues: "At FachPack we are not only showcasing our technologies for maximum performance, but also our services. For some time now, we have been offering our 360° service for packaging development and optimization. Our training courses at the Marbach Academy have also become very popular with our customers and attract a great deal of interest at trade fairs. We are looking forward to welcoming many visitors to our stand 612 in hall 7."

### About Marbach

Packaging. Performance. You. This is the slogan of Marbach, the world's leading manufacturer of die-cutting and thermoforming tools. With 1,500 employees worldwide, Marbach sets the benchmark in its industry. Since 1923. And delivers pure performance to its customers. Totally individual. For each requirement the best solution. In every price range. Worldwide.
